Foreword

The Jones County Agricultural High School began its fourth session on September the 8th, 1914, with an enrollment surpassing that of any previous year of the school. During the year 1911-12 only sixty-five students were enrolled and this number has gradually increased every year to the present enrollment of two hundred high school students. These figures alone are sufficient evidence to show that the school is meeting a long felt need in the county.

In proportion with the increase in attendance, the school has grown in equipment and teaching force. Beginning with a single brick building in 1911, the school plant has grown to where it now comprises two three-story brick dormitories, a brick academic building, a Home Science building, barn, silo, cow shed, and farm machinery house. Each of these first four buildings is equipped with electric lights, water works, steam heating system and other modern conveniences. In fact, the school has at present one of the largest and best plants of its kind in the state and hence is equipped for doing better and more thorough work than ever before.

The number in the faculty has increased from three teachers in 1911 to eight teachers and a matron at present. All of these teachers hold degrees from the best colleges in the South and most of them have had several years of experience in teaching. By increasing the number of teachers, the school has been able to organize its work into departments and to place each department in charge of a thoroughly competent teacher who is specially fitted for that particular work. This arrangement makes it possible for the school to do very efficient class work since each teacher is somewhat of a specialist in his subjects.

The purpose of the Jones County Agricultural High School is twofold. First, it strives to give every boy and girl in Jones County a thorough and practical high school education which will not only fit them for college and for teaching, but will also fit them for life on the farm. And it gives this education at such a small cost that any boy or girl, however poor, can take advantage of it. Second, the school is striving in every way possible to help the farmers of the county who are too old to attend school. It is doing this by vaccinating hogs, pruning and spraying orchards, terracing and tile-draining land, building and filling silos and encouraging better live stock. If there is any Jones County farmer who needs help on any such matters the school will take it as a favor if you will call on it and allow it to help you.

Home Science Building.

Location

The Jones County Agricultural High School is located at Ellisville, the county seat of Jones County. Ellisville is one of the oldest and best known towns in South Mississippi. It is centrally located, being about a hundred and twenty-five miles north of New Orleans, sixty-five miles south of Meridian, within twenty miles of Hattiesburg, and seven miles of Laurel. Both the N. O. & N. E. and the N. O. M. & C. railroads enter the town, and an electric car line is in operation between Ellisville and Laurel. The general health of the town is almost unsurpassed. The water supply for the school comes from a well three hundred feet in depth and is bountiful and pure.

The people of the town are noted for their generosity and hospitality, and they do everything in their power to make the school a success and the lives of the students pleasant and profitable. Ellisville has three churches, Presbyterian, Baptist and Methodist, all with good Sunday Schools. Most of our students are enrolled in these Sunday Schools and all are required to attend the church of their choice every Sunday.

Building and Equipment

The school has excellent buildings and equipment. We have a large modern brick dormitory which will accommodate forty girls. On the first floor of this building is a large kitchen, dining room, dairy room and girls' laundry room. The dining room will seat over one hundred people. The dairy room is equipped with Cream Separator, Babcock Tester, etc., and is used by classes in dairying and also by the boys in charge of the school cows, all work being superintended by the farm director. The laundry room was designed and built by our Manual Training department and is now being used by the dormitory girls under the direction of the Home Science teacher. The boys' dormitory, also a three-story brick building, will accommodate ninety boys. In the basement of this building is the boys' wood shop which is equipped with fourteen work benches and complete sets of wood working tools. The third brick building is used for academic work. It contains six large class rooms, an office, a library, an auditorium, a drawing room, and a Chemical Laboratory. The auditorium is equipped with indirect lights, a good stage, and will seat five hundred people. Both laboratory and the drawing room are well fitted with modern apparatus for their work. The school has one of the most modern Home Science buildings of any county high school in the state. This building contains a well furnished bedroom, bathroom,

"Grown in Mississippi" Day at A. H. S., November 25th.

reading room, dining room, kitchen, cooking laboratory, sewing room, and several pantries. All of our school girls have their home science work in this building under the supervision of a competent Home Science teacher.

The school farm comprises forty acres of land and is under the supervision of the farm director. This land was very poor and run down when first taken over by the school but has been greatly improved during the past three years. It has been stumped, terraced and ditched, and soil improving crops have been planted on every acre every year. The farm is well equipped with modern machinery, a good barn, silo, cow shed, forge shop and farm machinery house. It also owns three good horses, six head of cows, and fifteen high grade hogs. The boys do all the work on the farm and care for the farm machinery and live stock under the instruction of the farm director and thereby get valuable training in all kinds of practical farm work.

General Information

The next session will begin on Tuesday, September 7th, 1915, and it is urged that every boy and girl who expects to enter school for the session will inform the principal of this intention by August 15th. It is very important that this be done by this time, so that rooms and accommodations can be reserved. We believe that the school will be crowded, and we want to prepare to give every student the very best accommodations possible. The opening day of school will be given over to matriculation and registration. On entering school you are urged to go directly to the principal's office, where you will be registered and assigned to your room. Boys attending school will be directly under the charge of the Principal and his assistants. Girls will be in a separate building and under the care of a competent matron and other lady teachers. The school will be the children's home and every home like influence will be thrown around them at all times.

The pupils will be allowed to go home on Saturday and Sunday at stated intervals, but only by written permission from their parents directly to the Principal of the school. We encourage right living and a high moral tone at all times.

Each student on entering school is required to sign the following pledge: "I do promise on honor that while I am a student of the Jones County Agricultural High School not to have in my possession any kind of fire arms, (except those issued to Military company by the school), not to drink or bring on campus or in school any form of intoxicating drink, and not to leave school limits without permission from proper authority."

Dining Hall.

Uniforms

All girls who board in the dormitory will be required to wear navy blue uniforms for traveling, to church, Lyceum numbers and other public gatherings. These uniforms will consist of serge skirts and measaline shirtwaists. In order to get the same shade of blue, each girl will be expected to purchase material subject to the approval of the teacher in charge of this matter. Every girl will be encouraged to make her own uniform under the direction of the Home Science teacher. Whether made at the school or elsewhere, these skirts and waists must be made by patterns selected by the uniform committee. Any navy blue wrap or coat may be worn, provided it has no trimmings or buttons of contrasting colors. A uniform hat will be ordered for each dormitory girl soon after school opens. This uniform is designed to reduce the expenses of the girls, and in order to accomplish this end, must be adhered to. Parents are urged to co-operate with the teachers in this matter, and in this way to prevent much unnecessary and extravagant expenditure of money.

Expenses

No tuition will be charged to students from Jones County. Pupils from other counties will be charged at the low rate of \$2.50 per month, or \$20.00 per year, if paid in advance.

Rooms in dormitory are free to all. The rooms are equipped with a bed, washstand, bureau, table and chairs, bowl and pitcher, broom, etc. The only things students will be required to bring from home are pillows, bed clothing and towels. The rooms are steam heated, electric lighted and well ventilated. A small Matriculation fee of \$2.00 will be charged every student on entering school. This will be used for Lyceum course, Library, etc. The only other expenses to the pupil will be for books and board. Board in the dormitory shall be given at actual cost, which, during the last session, averaged about \$7.75 per month. We don't believe that board will exceed \$7.75 per month for the coming session. Deserving students will be given work whenever possible, and they can pay a part of their board in this way. The work will be divided as equally as possible among the pupils needing it.

Board will be required to be paid one month in advance. On entering school, \$8.00 must be deposited by each boarding pupil for the first month's board. If at any time a pupil has to stop school, the money paid in advance will be refunded.

Exhibit Room

Entrance Requirements

All pupils who have completed the seventh grade work in the public schools can enter the Agricultural High School without taking examination. Those who have not completed the seventh grade will have to take examination on this work before entering. These examinations will be given on the first day of school. Any student expecting to enter the A. H. S. should bring a report card from the last school attended or a certificate from their teacher stating the subjects and grade they have completed. It is IMPORTANT that they do this in order that they can be properly classified without delay or inconvenience.

Requirements for Graduation

To be eligible for graduation boys, in addition to the other ordinary high school studies, must have done at least three years' work in Agriculture and two years work in Manual Training. Girls, in addition to the other regular high school subjects, must have had at least two years' work in Home Science. This will not debar students who are otherwise prepared, from taking fourth year work, but no diploma will be issued till the required work in Agriculture and Manual Training or in Home Science has been done.

Course of Study

The course of study covers four full high school years and is the course adopted for the agricultural high schools of this state.

FIRST YEAR.

	Periods per week.
High School English Grammar.....	5
Advanced Arithmetic.....	5
Spelling.....	2
Elementary Botany.....	2
Zoology.....	3
Agriculture.....	5
Home Science (for girls).....	5
Manual Training (for boys).....	5

Wood Shop—Manual Training Department

SECOND YEAR.

Algebra	5
Composition and Rhetoric.....	5
Ancient History	5
Chemistry	5
Agriculture	5
Home Science (for girls).....	5
Manual Training (for boys).....	5

THIRD YEAR.

Composition and Rhetoric.....	2
English Literature, with Classics.....	3
Algebra and Plane Geometry.....	5
Modern History	5
Physics	5
Agriculture (for boys).....	5
Home Science (for girls).....	5

FOURTH YEAR.

American Literature with Classics.....	5
Plane Geometry and Solid Geometry or Book-keeping.....	5
American History and Civil Government.....	5
Agriculture (for boys); Home Science (for girls).....	5
Electives	5

Two periods per week of practical work on the farm will be required of all boys in all classes. This course is designed to give the pupils completing it a strong industrial education and a thorough training in the high school literary subjects. A synopsis of the work covered in the various subjects is given below.

AGRICULTURE.

S. J. GREER, B. S.

The first year's work in agriculture will include Warren's Elements of Agriculture and bulletin work. It will be our purpose to give the pupils taking this work a general idea of the subject in all of its phases. The second year's work will be devoted to a detail study of the soils of the County and the crops of the State. The third year will be given over to a study of the breeds of live stock, including the feeding, breeding and care of the farm animals and the subject of Horticulture. In the fourth year we take up the study of farm management, farm book-keeping, farm surveying and marketing crops. In

Base Ball Team

each year practical work is given along with the study of the text book. The boys are taught to know and to handle good live stock, good farm implements, to terrace and tile drain land, to spray fruit trees, etc.

SCIENCE.

O. V. AUSTIN, M. A.

In order to have a thorough understanding of the science of agriculture, the student must know something about Botany, Chemistry, Physics and the related sciences; therefore, we make our course in science stronger than in most high schools. In the first two terms of the first year we take Colton's Descriptive and Practical Zoology, with special reference to the habits of insects and animals which are helpful and those which are injurious to man. The third term is given to the study of structural Botany and the identification of plants and weeds of this section. The second year's work is devoted to Chemistry, taking four periods per week in recitations from Kahlenberg & Hart's "Chemistry and its relation to Daily Life" and two periods per week practical work in the chemical laboratory. As suggested by the text, this course is designed not only to give the student a thorough knowledge of the theory of Elementary Chemistry but to teach its practical relation to daily life. Hoadley's Essentials of Physics is studied throughout the third year.

HISTORY

MRS. L. R. COCHRAN, M. E. L.

To strengthen the cultural side of our course of study, we give three year's work to history, Ancient History the second year; Modern History the third year; and American History and Advanced Civil Government the fourth year. Two year's work in one of the modern languages may be elected in place of two years of the history.

MATHEMATICS.

F. J. HUBBARD, B. S.

The first year's work in Mathematics includes the study of Colaws and Elwood's Advanced Arithmetic, beginning at fractions and finishing the text, with introductory Algebra and special emphasis given to farm problems. In the second year Milner's High School Algebra is studied as far as quadratics. The third year's work continues the study of quadratics and advanced algebra for the first two terms.

Military Company

The next term of the session is devoted to the study of Wentworth's Plane Geometry. The fourth year completes Plane Geometry and takes one term of Solid Geometry or Book-keeping.

ENGLISH.

MISS MATTIE R. WELBORN, B. S.

The first year's work in English embraces a thorough study of the entire text, Kimball's English Grammar. In the second year, Composition and Rhetoric is taken four periods and some classic one period each week for the entire session. This course is designed to give a knowledge of the principles governing effective composition; to create a desire for reading, and some ability to appreciate good literature, and to teach clearness and correctness of expression. The work consists of recitations from Brook's Composition and Rhetoric, and from classics, and numerous written exercises in paragraph writing and in the various forms of composition. Halleck's History of English Literature is studied with English Classics three periods, and Brook's Composition Book II, two periods each week, in the third year. The fourth year takes Halleck's History of American Literature with American Classics.

DOMESTIC SCIENCE.

MISS KATE CUNNINGHAM, B. S.

The course of Home Science is planned to give the girls of Jones County an intelligent appreciation of home-making as an art, as well as proficiency in the performance of the ordinary household activities. The work of the first year includes the elementary kinds of cooking and sewing. The girls who live in the dormitory make their own uniforms and all girls make their laboratory aprons that are used in cooking classes. In the making of these garments the simpler stitches and the use of the machine is taught. The cooking course for the first year is a study of food principles with illustrative laboratory work. The students of the second year have a more detailed study of food principles, and the combination of foods into a balanced menu is given careful attention. Household sanitation, house-cleaning and a continuation of the sewing begun in the first year are also given definite attention.

The third year's work continues the study of house planning, furnishing and sanitation. Every girl is expected to take a part in the care of the home science house in which the work of this department is carried on. Each senior student is required to show that she is able to plan, prepare and serve a complete meal. Home sick-nursing

Boys' Basketball Team

and special diets are given a place in this fourth year's work. The study of normal diet and a balanced ration is re-emphasized and impressed in this course.

MANUAL TRAINING.

E. L. WATSON, B. S.

The Manual Training Department is well equipped for doing first class work in wood, iron and drawing. The wood-working department is furnished with fourteen modern work benches and all necessary tools for doing first class building and repair work. The iron working department consists of a well supplied blacksmith shop in a separate building. The drawing department is equipped with fourteen complete sets of drawing instruments and all necessary fixtures for making pencil and ink drawings and making tracings and blue prints of drawings. The object of this course is to teach the boys how to use both wood and iron working tools, build farm buildings, repair farm machinery and to make and be able to read agricultural drawings. Every student is required to take this work four hours per week for two years or the equivalent.

The first year's work consists of mechanical and agricultural drafting and exercises in woodwork, together with text book on same. The second year's work is a continuation of the first year's work in wood with special attention given to building farm houses and repairing farm machinery.

MUSIC.

MISS METTA COLLINS, M. E. L.

The school owns a good piano, and all pupils who want to take music can do so here in school at a reasonable rate. We have an excellent teacher who gives daily lessons in music to those who want it.

ORGANIZATIONS.

Believing that a certain amount of recreation and exercise is necessary for the best development of students, we encourage our students in these things. Among the organizations in school is a literary society, a military company and several athletic teams.

Girl's Basket Ball Team

ATHLETICS.

All forms of clean athletic sports are encouraged by the management of the school. The athletic teams have been very successful in the last two years. The boys' Basket ball team won the championship of the state for the last two seasons and have not been defeated in defending this title. The track team was also among the best in the State last year and the outlook is bright for a better team this season. Our claim for state high school championship in baseball last season was not questioned as we were undefeated by high schools, being defeated only by strong college teams.

The athletic teams of the school are directly in charge of the faculty and no pupil is allowed to play in games unless he does satisfactory class work. We believe that the right kind of athletics is one of the best methods of promoting health and school spirit and that the school should run athletics and not allow athletics to run the school.

Our athletic teams are exceptionally strong in view of the fact that we positively do not give any compensation whatever to those participating as we believe athletics should be secondary in school work and that no school should emphasize it to the extent of offering pecuniary gain to good athletes.

LITERARY SOCIETY.

The Literary Society has done better work this year than ever before in the history of the school. Regular meetings every two weeks are held and interesting programs are rendered. This is one of the best features of the school, as it teaches the boys and girls how to speak without embarrassment and how to use the English language correctly. The officers of the society for the three terms of this year are given below:

Officers.		First Term.
President	Roy Hilbun
Vice-President	Sherwood Riser
Secretary	Daisy Walters
Corresponding Secretary	
Censor	George Brent
Critic	Della Denham
Marshall-at-arms	
Officers.		Second Term.
President	Britton Rogers
Vice-President	Rufus Bush
Secretary	Jennie Myer
Corresponding Secretary	Wood Robins
Censor	Burl Welborn

Critic	Miss Mattie Welborn
Marshall-at-arms	Will Lewis
Officers	Third Term.
President	Rufus Bush
Vice-President	Verda Knight
Secretary	Della Denham
Corresponding Secretary	Mary Cunningham
Censor	Albert Sidney Noble
Critic	Mr. Watson
Marshall-at-arms	

MILITARY COMPANY.

The school has a military company, known as the Hubbard Guards. This company is an independent student organization having its own constitution and by-laws, electing its own officers, but under the supervision of an instructor from the faculty. The rifles used are supplied by the school and the uniforms are furnished by the individual members of the company. The company has regular drills every week. The military drills and discipline teach the boys to respect authority, to obey orders promptly and to carry themselves erect at all times. The officers for this session are as follows: Dayton Crosby, Captain; Earnest Reeves, First Lieutenant; Floyd Jordan, First Sergeant; Henry Boutwell, Second Sergeant; Jose Herrington, Third Sergeant; Jeff Hilbun, First Corporal; Burl Welborn, Second Corporal; Kirby Bryant, Third Corporal; Wood Robins, Fourth Corporal.

STUDENT ROLL FOR THE SESSION OF 1914-15.

SENIOR CLASS.

Lucy Allen	Ellisville
Vester Bankston	Ras
H. L. Boutwell, R. F. D.	Laurel
Lex Brame	Bay Springs
Rufus Bush	SoSo
Ira Cochran, R. F. D.	Ovett
Virgil Collins, R. F. D.	Ellisville
Dayton Crosby	Moselle
Burleigh Downing	Ellisville
Berry Entrekin, R. F. D.	Ellisville
Erette Grantham, R. F. D.	Ellisville
Tom Hand	Ellisville
Leffie Herrington R. F. D.	Ellisville

Maxine Hull	Ovett
Joe J. Jones	Ellisville

RURAL PHONE CONNECTIONS

Let The Store Accomodating Serve You

The spirit of our advertising is the practice of the store and the practice of the store is **courtesy**.

Courtesy is an asset to the individual—

Courtesy is an asset to a business—

Courtesy is a particular asset to the business of The Davidson Dry Goods Company.

This business lives and grows day by day in the midst of keen competition. If this service was not right, people would not come the second time.

Every day we hear comparisons highly complimentary to the service of The Davidson Dry Goods Company's Store, where good service, courteous and helpful salesfolk is the rule rather than the exception. Better today than it was six months ago. It will be still better a year from now.

We want, however, our service criticised—our managers will give you ready audience to discuss any experience that you may have had at the store.

VISITORS ALWAYS WELCOME
